

## PRACTICAL 6

## BLOGS

The screenshot shows the Blogger 'Post Edit' interface. The title is 'One day at Maldives'. The main content area contains a paragraph of text followed by a photograph of a wooden pier extending over clear turquoise water towards several overwater bungalows under a blue sky. The right sidebar shows 'Post settings' with 'Labels' expanded, 'Published on' set to 3/20/22 10:21 PM, and 'Permalink' and 'Location' sections. The Windows taskbar at the bottom shows the date as 20-03-2022.

This screenshot shows the same Blogger 'Post Edit' interface. The title remains 'One day at Maldives'. The main content area now features a paragraph of text followed by a photograph of a scuba diver swimming over a coral reef. The right sidebar settings are identical to the previous screenshot. The Windows taskbar at the bottom shows the date as 20-03-2022.

Some facts about Maldives

- It's only been a destination for 40 years
- Less than a fifth of its 1200 islands are inhabited
- You can swim with the biggest fish in the sea
- The beaches are incredibly rare
- It's the lowest nation in the world
